MACROMOLECULES AND INTERFACES INSTITUTE

VIRGINIA TECH

Graduate degree in

Macromolecular Science and Engineering (MACR)

M.S. and Ph.D. Degrees in Interdisciplinary MACR Program

Key feature: flexible integration of cutting-edge research with graduate training

For information and to apply, visit www.mii.vt.edu
Early applications are encouraged and review is ongoing - Applications will no longer be accepted after April 1st

MII nurtures interdisciplinary interactions at new intersections of macromolecular science and engineering with over thirty core faculty and 120 graduate students. MII is consistently ranked as a leading institution in polymer research and education.

MACR is a university-based degree program spanning multiple departments, with research and classes conducted under the direction of faculty from: Materials Science and Engineering, Chemistry, Chemical Engineering, Civil and Environmental Engineering, Engineering Science and Mechanics, Mechanical Engineering, and Sustainable Biomaterials.

Students may design their programs of study to focus in one (or more) of the following areas: polymer structure, polymer processing, polymer synthesis, polymer mechanics, composites and structures, polymers in medicine and biology, adhesion and surface science, micro- and opto-electronics.

Macromolecular Science and Engineering Program

Attn: Prof. Robert B. Moore, Program Director (rbmoore3@vt.edu) or Tiffany Carpenetti, Program Coordinator (carpenetti@vt.edu)
Virginia Tech
1075 Life Science Circle, Suite 110 (MC 0201)
Blacksburg, VA 24061
Phone: (540) 231-6717
