

Course materials:

Biochemistry, 6th ed. by McKee & McKee. Student Study Guide (optional, but **highly** recommended)

OBJECTIVES: Objective lists will be found at the beginning of each Unit and correspond to the chapters in the course textbook. You should know the answers to these objectives in preparation for each Unit test given on the days shown below. While no specific problems are assigned, it is recommended that you try a sampling of the problems at the end of each chapter. The answers to some problems are found at the back of the textbook. The answers to the remaining problems are found in the *Study Guide*.

COURSE HELP: Please email me at any time (use Online Biochemistry in the subject field). Review sessions will be scheduled each week via Zoom on Tuesday & Thursday at 5:00 pm EDT. The sessions are recorded for those students who can't attend.

TEST DATES:

The test window on each test date will be open from 6am to 6pm. Within that window you will have **two hours** to complete the test.

Sept 4 (Unit 1); Sept 23 (Unit 2); Oct 14 (Unit 3); Nov 2 (Unit 4)
Nov 16 9am-12 noon (Unit 5) This test is in the final exam period!

Many students will binge view all of the Unit videos early in the timeline and then do a slower review as the test date approaches! You may move as quickly as you wish!

UNIT		<u>STUDY</u>	<u>TIMELINE</u>		Chapters Shown
1	AUG 19	=====>	=====>	SEPT 2	UNIT 1 TEST (1-4, AAs in 5)
2	SEPT 4	=====>	=====>	SEPT 21	UNIT 2 TEST (5b-8a)
3	SEPT 23	=====>	=====>	OCT 12	UNIT 3 TEST (8b - 10)
4	OCT 14	=====>	=====>	OCT 30	UNIT 4 TEST (11 - 14)
5	NOV 2	=====>	=====>	NOV 13	UNIT 5 TEST (15 - 19)
