How to Import Course Information into yourProposal

Importing existing course information from the catalog will ensure you are making edits to the most current information.

1. In a web browser, go to wm.curriculog.com
2. Click “Login” at the top right
3. Enter your W&M user ID and password
4. Navigate to “Proposals”, on the top left side of your screen

Click the plus sign next to New Proposal.

5. Select the appropriate Approval Process by clicking on it. The options where you would import existing information are:
   a. Course Change Application – use if you want to change something about and existing course
   b. College 200, 300, 400 or Domain Attribute Application – use if your existing course will carry a college attribute (i.e. C100, C200), or domain attribute (i.e ALV, CSI, NQR)
   c. GER Attribute Application – use if your existing course will carry a GER attribute (i.e. GER 7, 4B)

6. Once you’ve clicked on the appropriate form, click the Start Proposal icon (the white check mark in the blue circle) to start the application.

7. Once you click the Start Proposal circle, the form will appear on the left side of your screen and the Proposal Toolbox will appear on the right. You will be working on the form on the left side of your screen.

8. Turn on the Help Text by clicking this icon at the top right

Originator Instructions – Import Course Information
9. Click the downward-sweeping arrow at the top left of the page to begin the course import process

10. Click on the catalog from which course information will be collected

11. Click the down arrow in the “Or add filter” area and select “Prefix”

12. In the Prefix box, enter the (normally) four character subject prefix for the course information you want to import
13. Click the dropdown arrow in “Add another filter” and select CODE (this is the field name Curriculog uses for Course Number).

14. Enter the Course Number (I've use PHIL 215 in this example)

15. Click Search Available Curriculum. You’ll see the course you’ve searched for appear at the bottom.

16. Click on the course to begin the import process
17. Click “Import This Item”

**Import Data Into Your Proposal**

Confirm the fields that will be imported into your proposal (only fields that are mapped will be listed here). If you would like to prevent the imported data from overwriting an existing field in your proposal, click “Import Field” to uncheck that field.

Once you click Import, your data will be validated against the proposal. Any data that is incorrect will have a message telling you what is wrong with the data, and it will not be imported into the form to prevent errors.

</table>

18. To view the imported information, navigate back to your “My Proposals” tab to find the course you just imported. When you click on the course, three icons will show up on the right side of the course’s box.

19. Click the Edit Proposal icon to continue filling in all of the required boxes, but......

![Stop Sign]

21. **READ** and follow these instructions to complete this process!!!!

22. Complete all of the required fields, marked with an asterisk but **DO NOT CHANGE** anything else. You will make changes AFTER the proposal is launched. That way the changes you would like to make will be tracked and highlighted on the form.
23. When the form is complete, launch the proposal. (Scroll back to the top and click the right directional triangle on the top left part of the page.)

24. If you do not get the Launch Proposal box, then you will need to scroll down to review any error messages printed in orange colored text.

As the “Originator” of this proposal, you are the first one to act on it by making changes to it. Everyone voting on this application can see what changes you are making to the existing information. For that to happen, you must make those edits in the Originator approval step of this process, NOT in the “Launching” step (outlined above). The Originator step will track and highlight the changes you are requesting.

25. Go to the My Tasks tab
26. Click the course you are going to edit, which will highlight these five icons

27. Click on the Edit Proposal Icon
28. **NOW,** make your edits to the course on the left side of your screen
29. Be sure to click save under each box where you make a change
30. Once you have made all of your changes, on the right side of your screen (in the Proposal Toolbox), click the down arrow in the “Show Current” User Tracking area to highlight “Show Current with markup.” Then on the left hand side of your screen you can see all of your edits in red.
30. This will make it easier for those that are approving the proposal to see what changes you are making. For example, changing credits from 3 to 5….

31. Finally, click the decisions icon to “approve” your own changes to this application. Click the “Make My Decision” button after you click approve. Once you “approve” the application, it will move on to your department.
