Welcome to the second edition of the College of William & Mary’s Economic Development newsletter - CONNECTIVITY. Much has happened at William & Mary since the last edition of the newsletter.

For starters, in April 2009 the College’s Board of Visitors approved a strategic framework for the next five years to move William & Mary toward achieving its vision. Throughout the strategic framework, opportunities abound for the Office of Economic Development to continue to engage the College’s faculty and students in our five major projects that leverage the unique strengths of William & Mary: 1) Greater Williamsburg, 2) Chesapeake Bay, 3) Hampton Roads Technology Clusters, 4) City of Portsmouth - World Class Maritime Center, and 5) The Petersburg Partnership.

The College’s Technology and Business Center completed year one of a two year project with Opportunity Inc. of Hampton Roads to deliver its signature Business Strategic Education Module Series for the SEVA-PORT project. Under this program representatives from the Transportation, Warehousing, Distribution, and Modeling & Simulation industries received classroom instruction from faculty members at the Mason School of Business with funding provided by the United States Department of Labor.

Finally, Leonard Sledge was promoted to the Director of the Office of Economic Development. Since joining the Office of Economic Development in 2007, Leonard has been a key contributor in our success. In his new role, Leonard will continue to look for innovative ways to CONNECT the College of William & Mary with diverse organizations for the purpose of helping to build a stronger local, regional, and statewide economy.

We hope you enjoy reading CONNECTIVITY. To find out more about William & Mary Economic Development and to discuss ways we can work with your organization please complete our contact card. We look forward to hearing from you!

Thanks,
Jim

• Developing the City of Williamsburg’s Creative Economy
  Nationwide, over the last two decades, there has been a growing movement linking arts and cultural assets with the economic development goals of creating jobs and wealth, connecting positive, sustained growth to the ability to create new products and services (Maine Arts Commission, 2004). The College of William & Mary Office of Economic Development recently collaborated with the City of Williamsburg to write the white paper, Developing the City of Williamsburg’s Creative Economy.
