Final Jeopardy
What is the Employee’s First Report of Accident/Injury form?

The form used to report chemical injuries and illnesses.
What is the Virginia Hazard Communication Standard?

VAOSHA 29 CFR 1910.1200 provides requirements for this program.
Who are all faculty and staff?

This group of people must be informed about the hazardous properties of materials they use at work and how to protect themselves from these hazards.
What is a workplace evaluation or survey?

EH&S staff would do this if an employee(s) had a question about their hazard exposures in a work area.
What is four?
The number of stages in a hazard communication program.
What is the Right-to-Know

The entitlement given to every employee by the hazard communication standard.
What is Section 8 Exposure Controls, Personal Protection?

This is the section in a Material Safety Data Sheet that tells if you need to wear safety glasses or gloves when handling the material.
What is False?
True or False: Your employer may provide you a generic MSDS for a hazardous material as long as all required sections of information are provided.
What is 100%?

At any given time, your employer must have MSDSs on file for this percentage of materials used in the workplace.
“Don’t Choke!”

Daily Double
What is 24 hours?
The amount of time an employer has to produce a MSDS after an employee requests to see a copy.
Who is the supervisor?

The person responsible for following up with a manufacturer to get a copy of a missing MSDS.
What is an NFPA Diamond? The type of label shown in this picture.
What is a HMIS Label?
This label is designed to go on individual containers of products that don’t have manufacturer’s labels.
What are pesticides?

These chemicals are exempt from VAOSHA HAZCOM requirements because their labeling requirements are covered by FIFRA.
What is a label?

When a transfer container is handled by only one person and the container is filled and emptied in the same shift, the container does not need to have one of these.
What is water reactive?

The hazard indicated by the symbol in the white section of the NFPA Diamond.
Who are the EH&S staff?

The persons responsible for providing hazard communication training.
What is True?

True or False: HAZCOM training must be documented.
What is 30 days?

Initial HAZCOM training must be provided within this timeframe for new employees.
Who is the trainer?

The individual tasked to maintain records of HAZCOM training.
What is “whenever new hazards are introduced?”

Besides initial training, employees receive additional HAZCOM training when this occurs.
Who are the departments?

The organizational group(s) responsible for initiating the chemical inventory.
What is annually?

Chemical inventories are updated at this time interval.
What is the EH&S Office?

The organization responsible for maintaining a copy of all College MSDSs.
What are the product name and manufacturer name & contact info?

The minimum data needed on a chemical inventory
What are knox boxes? Chemical inventories are stored in these so that they are accessible to emergency responders.
Who is the Contract Administrator or Project Manager?

This individual is responsible for ensuring contractors are aware of hazards on campus.
Who is the workplace supervisor?

This individual is responsible for identifying workplace chemical, physical and biological hazards.
What is False?

True or False: Radionuclides and biohazard materials are included in the OSHA HAZCOM program.
What is the storeroom?

The location for Facilities Management MSDSs.
What is “checking with the lab manager/principal investigator?”

This is what you should do before entering a room bearing any or all of these hazard warnings.
