## Better Know a PRC Resource!

In each issue of The Post, we will feature a resource or item in the PRC that you may or may not know about. Hopefully this will help you maximize your potential in creating bulletin boards and programs—in the PRC, the only limit is your imagination! For the inaugural issue, *Better Know a PRC Resource* is featuring...

### The Poster Printer

This versatile PRC Resource is great for printing out larger-than-life bulletin board decorations or that premade study tips poster. You may have already gotten to know the Poster Printer during training, but most people don't realize that you can set your own sizes! See the "Did You Know" box below. One last note on the poster printer: we request that full colored pictures and backgrounds only be used for posters that will be up all year, in the interest of conservation. :-)

**DID YOU KNOW...?**  
The typical poster size is 24"x36" (2x3 ft), but you can actually size posters from as small as 24"x10" all the way to 24"x59" (2x6 ft)!
