Applied Research Center Student Newsletter

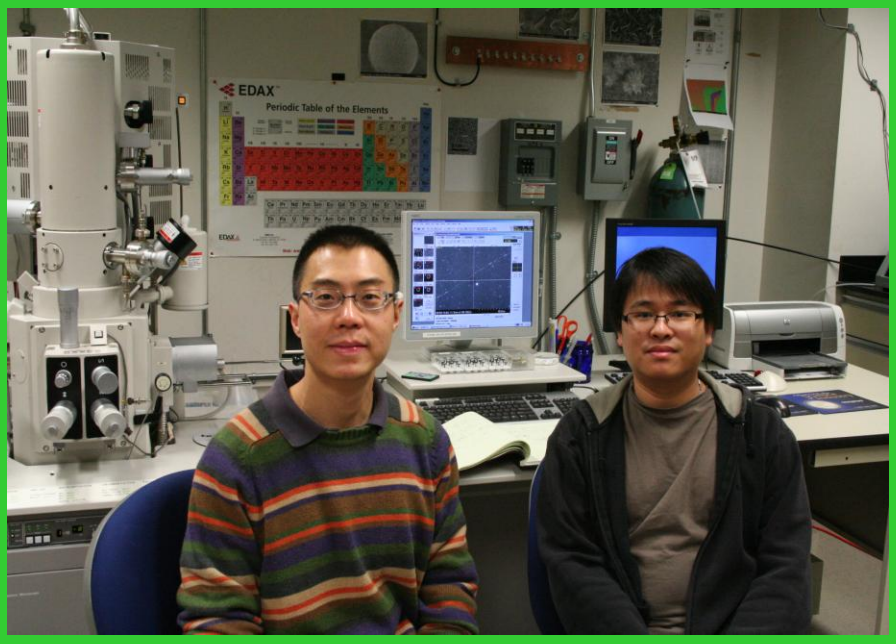
Lab Training:

In December, **Lei Wang**, College of William and Mary (W&M) Ph. D. student in the Physics, conducted training on the ellipsometer at the Surface Characterization Lab. **Zhaozhu Li**, W&M Ph. D. student in Physics, **Taina Matos**, recent Ph. D. graduate in Material Science and Engineering from Norfolk State University, and **Song Vick** participated in the training.

During the training session, **Vladimir I. Gavrilenko** (left)**,** Research Associate Professor, Center for Materials Research, Norfolk State University stopped by to discuss analysis of his samples with Lei.

Yuri Barnakov (right), also a Research Associate Professor for the Center for Materials Research at Norfolk State University, brought a sample for Lei to measure.

Lab Visitors:



Xin Zhao, Jefferson Lab scientist and W&M graduate, along with **Binping Xiao**, W&M Ph. D. student in Applied Science, are pictured here using the FESEM to analyze their samples.

Olga Trofimova is pictured here with **Kai Zhang**, recent Ph. D. graduate in Material Science and Engineering from Norfolk State University, and a group of students who came to the lab for a tour.
