ADMINISTRATIVE POLICIES

Attendance

You must be registered for each course and activity you attend. As a courtesy to instructors and members, please select your courses with the intention of attending all sessions. Absentee registered students result in underutilized classroom space and missed opportunities for members on the wait list.

Dropping a Course

If you need to drop a course before it begins, please notify the CWA office so they may contact the first person on the wait list to fill the available seat.

Guests

CWA courses and activities (including Town and Gown) are intended for CWA members. A member's guest may attend a course or an activity once, only if the course is not fully subscribed. Local guests must be considering joining Christopher Wren. The CWA office must be informed prior to any guest attending.

Inclement Weather Policy

CWA will cancel courses/activities/events/training for weather if the Williamsburg/James City County (WJCC) public schools are closed to students. If WJCC Schools are delayed, CWA will continue as scheduled. A notice will be on the CWA office voice mail (757-221-1506) and on the WJCC Web site (https://wjccschools.org). Please note, you will not be personally contacted.

Name Tags

Registrants will receive their name tag by e-mail approximately two weeks before courses begin. Plastic name tag holders will be available on the first day of your course. Please wear your name tag to all CWA events.

Refunds

Please note that Christopher Wren Association fees are membership fees. They are used to cover overall expenses of operating our lifelong learning program in a given semester and are not directly related to the number of courses you may take (i.e., there are no “per course” fees, and therefore, no “per course” refunds). Members are free to register for open courses (up to 8 course max) at any time, even after a semester begins.

The deadline for a refund of the membership fee is the first day of the semester. For spring 2018, the refund deadline date is January 22, 2018. Please submit a refund request in writing to ChrisWren@wm.edu. An explanation as to why you are cancelling is appreciated.

Part biography, part war epic and part wildlife adventure, Elephant Company tells the story of Billy Williams, who came to colonial Burma in 1929, fresh from service in WWI, to a job as a “forest” man for a British teak company. When Imperial forces invaded Burma in 1942, Williams joined the elite Force 136, the British dirty tricks department operating behind enemy lines where Williams and his elephants played a critical role in aiding the war effort. Elephant Company is an inspirational narrative that illuminates a little-known chapter in the annals of wartime history. **Reading: Required:** Elephant Company by Vicki Croke. Barbara Reynolds is an avid reader who has been a member of CWA’s Book Lovers Discussion Group since 2008 and belongs to three other local book clubs.

If you enjoy reading and/or discussing good books with others, you are invited to join me for a discussion of the book Reading Lolita in Tehran by Azar Nafisi. Every Thursday morning for two years in the Islamic Republic of Iran, where all forms of artistic expression were brutally repressed, Nafisi secretly gathers in her living room seven of her most committed students, who risk removing their veils and immersing themselves in the worlds of Jane Austen, F. Scott Fitzgerald, and Vladimir Nabokov. In this fascinating memoir, their own stories become intertwined with the ones they are reading. The book is a remarkable exploration of resilience in the face of tyranny and a celebration of the liberating power of literature. **Reading: Required:** Reading Lolita in Tehran by Azar Nafisi. It’s longer than some, and may take a few pages to hook you, but once you get into it, you will not be disappointed. Find it soon, start reading, and enjoy!

Sally Whiting has a degree in education from the University of Wyoming. She was an English teacher for eight years, and co-owned and operated a graphic arts/typesetting company. #VastEarlyAmerica will explore the geographic depth and breadth of the field that we refer to as "Early America." There has been no end of consideration about what Early America is, where it is, when it begins, and when it ends. The increasingly global outlook of scholars—with the early American geography expanding beyond just the Anglophone world—has added more dimensions to a field that encompasses four centuries and four continents. This class will explore the extraordinarily vibrant and vast field of study known as Early America.

Karin Wulf holds a Ph.D. in history and, in addition to her Omohundro Institute position, she is a faculty member in William & Mary’s department of history, where she teaches and advises undergraduate and graduate students.

1/24/2018 - 2/7/2018

This course examines how "we the people" ratified our Constitution and insisted on a Bill of Rights. The draft Constitution completed by the Constitutional Convention of 1787 was submitted to “we the people” for evaluation, and then a nationwide debate over ratification ensued between 1787 and 1788. We will look at this epic national conversation from start to finish, evaluating the arguments presented by both proponents and opponents of ratification. We will also see how this debate was the genesis of our Bill of Rights.

Michael Kerley is a retired attorney. He earned a degree in government at Notre Dame and a law degree at George Washington University. He practiced securities law for over 30 years with a major financial services company. Mike is now an instructor and speaker on the origins of the Constitution.

Horatio Alger’s late 19th century stories venerated the rise from rags to riches. But pluck only went so far; young men needed help to adapt to and succeed in the modern industrial world. From the late 1870s through the mid-1920s, the Young
Men’s Christian Association furnished educational opportunities otherwise closed to many of the nation’s men. Evening education programs offered technical to professional training. Campus Y-men welcomed first-generation college students four decades before deans of student emerged. And the Y’s post-WWI scholarships enabled returning vets to access education. Have you ever awakened and not felt like yourself? Or wondered why someone you’re talking with does not seem to get it? Or why conflict often only worsens despite our best efforts? Or why another culture seems so different? How we behave in private and with others is a rich mix of factors. Our preferences—laced with our motivations to seek gratification even in conflict, topped with national or cultural personality traits—influence how we interact, and what we do, each and every day. We can learn about these, and how they influence others.

M.B.A., Harvard Business School; B.S, Yale University. MBTI certified administrator since 2001 (Step I and II), consulting practice since 1983, and award winning author.

This class will focus on the origin, purpose, and framework of The Federalist and specifically on Federalist Papers #1, #10, #51, #68, #78, and #84.

Enhance your daily activities, work, and leisure time with practical, easy, and (sometimes) unusual shortcuts and tips. Save effort, time, money, and have fun as you learn. Re-purpose things and increase your organizational skills. Discover some simple techniques and ideas that can make a positive difference in your life. Examples: Be certain you remember where you put something, regardless of passage of time. Leave home knowing you DID turn off the coffee pot and close the garage door, etc. An idea for a great box opener for packages, one much safer than utility knives. Label easily, for free, computer “spaghetti” wires and other corded devices.
Linda Pincus is a registered nurse at Thomas Jefferson University in Philadelphia. She received her B.S. from Thomas Edison State University, provided medical care in hospital settings including Langley Air Force Base, maintained private practice in the fields of counseling expectant and new parents, and taught hospital-based and private classes in childbirth education, parenting, organization, communications, and behavioral changes.

1/23/2018 - 1/23/2018
Williamsburg Regional Library, Theatre

Lindbergh was Time magazine's first Man of the Year for making the first solo nonstop flight between two major cities across the Atlantic Ocean on May 20–21, 1927. For that 33 1/2-hour flight, Lindbergh was honored with awards, medals and parades throughout the world. But this intensely private man was never quite comfortable with the idolization thrust upon him and did not conform to the image of the hero the public sought. The study of Lindbergh demonstrates that heroes, like the rest of us, have many facets, some definitely flawed.

Sandy Menaquale has English and American studies degrees from Mount Holyoke College and briefly taught high school before receiving her M.B.A. She spent more than 28 years in pharmaceutical management for Eli Lilly. Upon retirement, she returned to the classroom, and taught GED to inmates and high school Spanish, history, and English. Currently, Sandy works for Thomas Nelson Community College in Workforce Development training adults for 21st century jobs.
Close to Home: The Williamsburg Area and the Revolutionary War
Lynch, John
Tue 9:30 AM - 11:30 AM, 1 session(s)
1/30/2018 - 1/30/2018
W&M Campus Center, Little Theatre
115 seats available

Williamsburg's Revolutionary history is superbly portrayed by various activities held by Colonial Williamsburg. What is left to tell? Plenty. Which nearby skirmishes and battles helped shape the final course of the Yorktown Campaign? Was biological warfare attempted near Williamsburg in 1781? What are Williamsburg's connections with the Virginia State Navy and the war at sea? Lastly, is there a Williamsburg area link to Jamestown-Yorktown Foundation's “AfterWARD” program which describes the ongoing influences and contributions of Revolutionary veterans in building and shaping our nation? This lecture will address each of these questions and potentially provide new insight into local history.

John Lynch is a physician assistant working in the Tidewater area. His avocational interests include military history and medical history. John's publications include articles about the Federal Navy's Civil War era Bureau of Medicine and Surgery, the Confederate Navy's Office of Medicine and Surgery, and the impact of disease upon a Napoleonic War British expedition.

Dr. Martin Luther King, Jr. National Memorial: How Public Art Speaks for a Culture
Jackson, Edward

2/20/2018 - 2/20/2018
W&M Kaplan Arena, Wightman Cup Room
125 seats available

The Executive Architect, Dr. Ed Jackson Jr., discusses the challenges and successes in the planning and design of a national memorial to honor the life and legacy of Dr. Martin Luther King, Jr., a process that took 28 years. Early in the programming phase, it was decided to make the King Memorial a living memorial, and not a monument to an individual (in our history) or to particular events in our past. The memorial had to provide an opportunity to share Dr. King's passion and his conviction and commitment to America and the American Dream. America refers to both a country and a construct (a government of the people, by the people, and for the people); both scenarios (America and the American Dream) have yet to fully realize their true potential. The musical artist Bono said it best: "England or Ireland is a country, America is an ideal!" The objective was simple—a memorial that could speak to future generations about this "wacky" idea called the American Dream (both literally and metaphorically), and about the importance of peace, justice, democracy, hope and love.

Edward Jackson has a B.S. in architecture from the University of Illinois, and a Ph.D. in architecture from The University of Michigan. He is the executive architect of the Martin Luther King, Jr. National Memorial Project, and served as Assistant Secretary of Defense for Health Affairs.

Many consider a Tesla Electric Vehicle (EV) a computer on wheels. Software changes are transmitted to your vehicle to add new features, install fixes and capture performance data. I will discuss the technologies used in the Tesla: the AC induction motor, the Lithium-ion battery and the Tesla Gigafactory that produces Lithium-ion battery packs. Also, we will look at the hardware and software that enable autopilot and full self-driving: surround cameras, ultrasonic sensors, radar and artificial intelligence. In the fall of 2017, an affordable mass-produced EV, the Tesla Model 3, will roll off the assembly line, and by then we should know a lot more about this vehicle.

If Walls Could Talk: Stone Walls of New York and New England

Delano, John
Mon 9:30 AM - 11:30 AM, 3 session(s)
1/22/2018 - 2/5/2018
WindsorMeade, Ballroom
80 seats available

The 250,000 miles of stone walls in New York and New England are an enduring testimony to the strenuous efforts and strong work ethic of 18th and 19th century subsistence farmers, who toiled 100-acre lots for generations. The farmers cleared trees from large portions of those lots for grazing their animals and growing crops, and also to use the wood to construct buildings, cook food, and heat their homes. Fields were cleared of stones to make the walls. With large-scale abandonment of farms in the late 19th century, the forests reclaimed the land, leaving the stone walls as silent reminders of past generations.

John Delano was a NASA-funded researcher for 30 years; retired from University at Albany (State University of New York) in 2016; Distinguished Teaching Professor Emeritus in Department of Atmospheric and Environmental Sciences (joint-appointed to Department of Chemistry); Associate Dean; member and chair of numerous NASA advisory panels; Ph.D. in geochemistry.

1/22/2018 - 2/5/2018
W&M Kaplan Arena, Wightman Cup Room

NASA-sponsored research has provided important insights into the components, processes, and environments that could have caused life to form on the Earth. More than 5,000 planets (2950 confirmed; 2337 candidates) as of September 2017 (http://exoplanets.org) have been discovered orbiting other stars. That information has put our own solar system into a new perspective. While planets are common in our galaxy, the structure of our solar system has some important, rare (not unique) characteristics. This course provides an overview of the methods and latest results on the search for life beyond the earth, and prospects for future discoveries.

John Delano was a NASA-funded researcher for 30 years; retired from University at Albany (State University of New York) in 2016; Distinguished Teaching Professor Emeritus in Department of Atmospheric and Environmental Sciences (joint-appointed to Department of Chemistry); Associate Dean; member and chair of numerous NASA advisory panels; Ph.D. in geochemistry.

The four notable Pharaohs were the last four Pharaohs of ancient Egypt’s 18th Dynasty (1570-1253 BC) of the New Kingdom era. They are Ankhenaten (Amenhotep IV) (1350-1334 BC), Tutankhamun (Tutankhaten) (1334-1325 BC), Ay (1325-1321 BC), and Horemheb (1321-1293 BC). The unfortunate young woman who was married to the first three of these Pharaohs was Ankhesenamun (Ankhesenpaaten). She is thought to have lived approximately 1350 BC to 1323 BC, and died before her 30th birthday.

From Frederic Barbarossa to Frederic the Great: 600 Years of German History
Carlucci, Frauke

1/22/2018 - 2/5/2018

The Age of Frederic the Great meant a period of greater religious tolerance and equality before the law. Great luminaries in the fields of science, music, literature and philosophy open up new concepts, bringing about a resounding change in all fields. The postulates of the French Revolution echo in Germany and lead to a gradual structural change. Napoleon's domination unites Europe to fight against a common enemy and brings about major changes in Europe's configuration, eventually leading to Germany's unification propelled by Otto von Bismarck. The emergence of a German Empire changes the political theater for Germany and Europe as a whole.

Frauke Carlucci spent her life in Germany, Argentina, Venezuela and the United States. She was educated at Johannes Gutenberg in Mainz, Old Dominion University and Richmond University, earning a M.A. In Germany she worked as a freelance translator and for Siemens. She taught all levels of German and Spanish language (including AP), history, and literature to a broad range of students. Working for international understanding, she organized many school exchanges and was also awarded a Fulbright scholarship.

**The Forgotten Front: The China-Burma-India Theater in World War II**

Riffer, Bill

3/14/2018 - 3/28/2018  
Williamsburg Regional Library, Theatre

China-Burma-India (CBI) was not a theater at all but rather two separate but strategically intertwined wars fought in arguably the worse conditions by some of the most interesting characters of the war. Its effect on the outcome of WWII was minor, but its effect on the remainder of the twentieth century was inestimable. This course will look at the Second Sino-Japanese War (1937-1945), including background, causes, strategic thinking, major battles, and outcome, and it will look at the Burma campaign (1941-1945), including why it was fought, major battles, strategic thinking, and outcome. Then we will review how CBI affected post-war east Asia.  

**Reading: Suggested:** *Stilwell & the American Experience in China 1911-1945* by Barbara Tuchman.  
*Forgotten Ally - China’s World War II 1937-1945* by Rana Mitter.

Bill Riffer is a retired career submarine officer with a lifelong interest in military history. In addition to at-sea commands, he also served as Atlantic Submarine Force chief of staff for doctrine, tactics, and training. He has degrees in nuclear engineering, national security policy, and international relations.

**The Holocaust: Confronting the Perpetrators**

1/25/2018 - 2/8/2018  
Discovery Park, New Town, Room 136  
40 seats available

Among the most troubling and perplexing issues raised by the Holocaust is how and why persons, who in other circumstances might well have lived ordinary lives, became participants in the mass murder of a defenseless people. This course attempts to address this subject by examining a range of perpetrators from those at the highest levels of power in Nazi Germany (Adolf Hitler, Heinrich Himmler), to those who ran the death camps (Franz Stangl), to the largely unknown thousands who constituted the killing squads. The reading and discussion of selected documents and Christopher Browning’s classic study, *Ordinary Men*, will help us engage with this issue.

Donald Schilling holds a Ph.D. in modern European history from the University of Wisconsin-Madison and spent 41 years teaching courses in this subject area at Denison University, including *Confronting Evil: The Holocaust in History, The Rise and Fall of Nazi Germany, and The Origins and History of World War II*.

In the fall of 1940 Britain was teetering on the brink of collapse. The RAF and Royal Navy were barely holding on. The Italians were moving towards Cairo and the vital Suez Canal from Libya and Ethiopia. If Cairo fell, the war in Europe was over and Russia would not survive. Beginning with Operation Compass, the tide began to change. This course will follow the exploits of the British and American forces as they drove the Axis Powers from Africa and the Middle East.

William Sharer is a Chicago native with a B.A. in biology and a minor in art history, Princeton; an M.D., Northwestern; urology training, Duke University and Northwestern University; associate professor of surgery, Bethesda Naval Hospital and Washington University in Saint Louis; Chief of Urology, Park Nicollet Medical Center in Minneapolis. World's Fairs: "Timekeepers of Progress"

4/3/2018 - 4/17/2018
W&M Kaplan Arena, Wightman Cup Room

From the 1850s and for over 100 years, World's Fairs were dominant cultural events in Europe and America. This course reviews the history and impact of these great expositions that both reflected and influenced the culture of their times. We will explore the role World's Fairs played in America following the Civil War and the Great Depression. Emphasis will be placed on America's four greatest—Philadelphia-1876, Chicago-1893, St. Louis-1904, and New York-1939. Why did government and business spend millions on these expositions? Why did people pay to visit them?

Jim Morford is a former public school social studies teacher and part-time Rutgers University instructor. For over 30 years he was a registered government relations agent in New Jersey, where he worked with state government officials and the New Jersey congressional delegation. Presently retired, he remains a partner in a consulting firm based in Trenton, New Jersey.
