Setting up Eduroam - Android

This document will cover downloading and installing the SecureW2 certificate installer for Eduroam. **Because each Android version is different, images and menus may be different**.
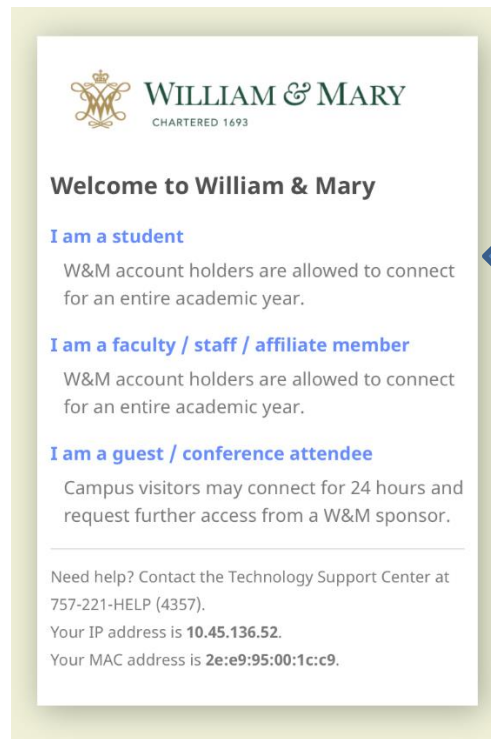

1. Download and install the SecureW2 JoinNow application
2. Install the Eduroam certificate

| Download and install the SecureW2 JoinNow application	
In the Chrome browser, visit https://connect.wm.edu Choose your role.	**WILLIAM & MARY** CHARTERED 1693 **Welcome to William & Mary** **I am a student** W&M account holders are allowed to connect for an entire academic year. **I am a faculty / staff / affiliate member** W&M account holders are allowed to connect for an entire academic year. **I am a guest / conference attendee** Campus visitors may connect for 24 hours and request further access from a W&M sponsor. Install the Eduroam Certificate

Once downloaded, the application will automatically open. (If the application does not open automatically, visit https://connect.wm.edu from Chrome and click the 'Install Network Configuration' button.) Click **Next**	You will now be directed to a secure website to provide your W&M credentials. Please click the 'next' button below. Next
Enter your Banner (CAS) credentials. Click login.	https://cas.wm.edu/cas/login?servic WILLIAM & MARY CHARTERED 1693 **W&M Central Authentication Service** **WMuserid:** txjeff **Password:** •••••••••••••••• ☐ I am at a public workstation. **LOGIN** ❓ Forgot your password? The service you are attempting to access requires that you authenticate using William & Mary's Central Authentication Service. For security reasons, please log out and exit your web browser when you are done accessing services that require authentication!
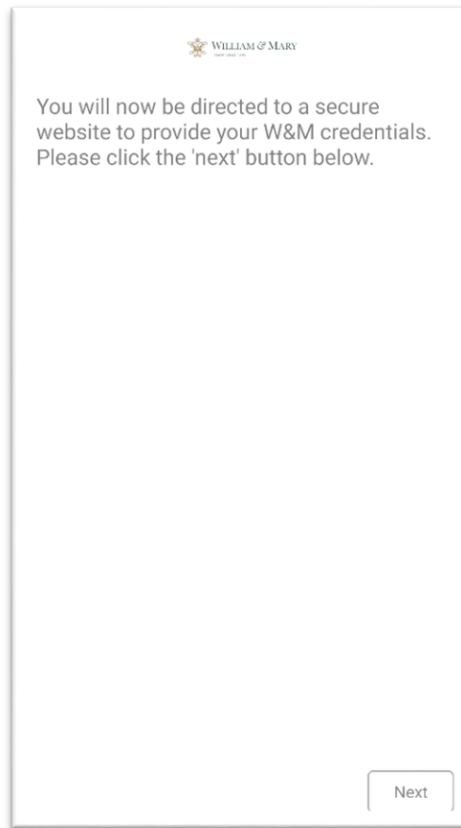

You will receive a notice that you are 'successfully connected to: eduroam'

Click 'Done'

Connected to: Waiting for IP Address...

Search and Setup New Network

Re-enter Credentials

Reconnect

Successfully connected to : **eduroam**

Note: On certain devices running Android Version 8 and above uninstalling the SecureW2 App would remove the WiFi config. We strongly recommended not to uninstall the App after configuration.
