

HONORS 2018

Lydia Boike

An Analysis of Oxidative Damage to Lactate Dehydrogenase in Context of Neurodegeneration and Catechol-Based Phenolic Antioxidant Chemistry

Anna Do

Gas-Phase Hydrogen-Deuterium Exchange and Fragmentation Studies of Tetrapeptides Containing Lysine and Its Homologs

Theresa Gozzo

Towards a Greater Understanding of Post-Translational Modification of Transcription Factor, ArsR, in *Helicobacter pylori* via Bottom-Up Proteomics: Methods Development for Electrospray and Nanospray Approaches

William Kim

Characterizing the Ductile-Brittle Transition of Polyamide-11 / Purification and Characterization of Boron Nitride Nanotubes

Tyler Larson

Photo-Controlled Release of Zinc Ions in Aqueous Solution with
Simultaneous Fluorescence Detection

Zachary Nimmo

Employing Unnatural Amino Acids Towards
Therapeutic Bioconjugates

Changen Pan

Imaging the Dynamics of CH_2BrI Photodissociation in the
Near Ultraviolet Region

Daniel Speer

Accessing Light-Sensitive Polycyclic Aromatics Through an
Alkynyl-Prins Cyclization

Amelia Wheaton

Alkyl Arylinium Iodocuprate Clusters: Structural and
Spectroscopic Diversity

Shichuan Xi

Investigation of the Catalytic Ability of Iron Complexes Containing Pendant Proton Relays
for Proton Reduction
