

Chemistry 458

Organic Spectroscopy

C. J. Abelt ISC1 2049 (office) cjabel@wm.edu 221-2677 (office phone)

Texts:

R. M. Silverstein, F. X. Webster, D. J. Kiemle, "Spectrometer Identification of Organic Compounds," 7th Ed., Wiley: New York, 2005.

Supplemental readings will be assigned during the course.

Grading:

§Tests	2	@	200 pts ea	400
Problem Sets	12	@	50 pts ea	<u>600</u>
			Total	1000

§in-class portion @ 100 pts ea; take-home portion @ 100 pts ea

Tests will cover both knowledge and application of the covered material. Students will have access to the tables in SWK for structure elucidation problems. Problem sets will be composed of problems from SWK as well as from outside sources. They will be assigned at the end of each information unit and will be due one week after assignment. You may work in groups for the problem sets but not for the take-home exams.

Coverage:

This course is divided into two parts: The first half will cover the theory and instrumental aspects of *nuclear magnetic spectroscopy*, *mass spectrometry*, *uv/vis spectroscopy* and *infrared spectroscopy* and the application of these techniques in organic structure elucidation at the intermediate level. The second half will cover two dimensional Fourier transform nuclear magnetic spectroscopy, both theory and application.

<u>Dates</u>	<u>Topic</u>	<u>Readings</u>
8/29 - 9/5	Mass Spectrometry	SWK, Chapter 1
9/7 - 9/14	Infrared Spectroscopy	SWK, Chapter 2
9/17 - 9/26	Proton Nuclear Magnetic Spectroscopy	SWK, Chapter 3
9/28 - 10/5	Carbon Nuclear Magnetic Spectroscopy	SWK, Chapter 4
10/8 - 10/10	UV/VIS Spectroscopy	
10/12	Test 1	
10/17-10/26	One-pulse Fourier Transform NMR	Keeler [†] , Chapter 3 & 4
10/29 - 11/9	Multi-pulse FT NMR	
11/12 - 11/19	Two-dimensional FT NMR	SWK, Chapter 5
		Keeler [†] , Chapter 7
11/26 - 12/7	Worked Problems	SWK, Chapter 7
12/11	Test 2	2 – 5 pm
