

**Educational Policy Committee Minutes**  
**September 12, 2011**

Because only one course was submitted for the EPC's consideration, and because the EPC's membership voted unanimously by electronic vote to approve the application, we did not hold our meeting as scheduled. Based on the electronic vote, the following actions were taken:

DANC 340 was approved both as a new course and as a GER6. In correspondence with the EPC chair, the instructor indicated that she was interested in having the course designated a GER5 as well. Because members of the EPC felt as if they needed additional information before considering that request, the instructor was invited to submit a formal application for GER5 approval for consideration at our next meeting.

At the request of the chair of Geology, the EPC's reconsideration of the application to transform ENSP 204 & GEOL 204 into INTR 204 was deferred until the meeting of September 26, by which time the chair of Geology can provide the EPC with Geology's perspective on the proposed change.

Respectfully submitted,

Carol Sheriff  
Chair, EPC
