Pre-College Student Use Policy
The Student Health Center at the College of William & Mary will be open during limited summer hours and may be used by NIAHD Pre-College participants in the event that a student becomes ill or injured.

It is important to know that use of the Student Health Center is NOT a free service nor is it included in the tuition for the Pre-College Program.

Like any other medical or emergency care facility, patients will be expected to pay for services rendered. It is the responsibility of the student and their parents/guardians to pay any and all fees.

Medical Services
The Student Health Center is equipped to provide a full range of primary care services including the evaluation, treatment and prevention of acute or chronic physical, mental, and social health issues.

Fees & Charges
The Student Health Center charges standard fees to all individuals for its services. These fees include:

- **Health Center Summer Fee**: $15.00 per 7-day period ($45.00 for 3 weeks)
- **Health Center Physician Fee**: range of $10.00-$30.00 depending on complexity of visit

There are additional charges associated with the following services:
- Laboratory tests
- Prescriptions for medications
- Some medical supplies
- Some surgical procedures
- Allergy shots
- Immunizations
- Missed appointments which are not canceled in a timely manner

Proof of Insurance & the Student Health Form
Pre-College Program participants must fill out a Student Health Form PRIOR to arriving on campus. As part of the health form, parents are asked to provide a copy of their child’s health insurance card. The Student Health Form and the accompanying insurance card will be delivered to the nurses at the Student Health Center by NIAHD staff and serve as proof of insurance.

After-Hours Care
Any student who reports feeling ill or injured to NIAHD staff and requests to see a doctor will be taken to the W&M Student Health Center. In the event that a student requires emergency medical care when the Student Health Center is closed, NIAHD staff will take them to a local emergency room or urgent care facility, such as M.D. Express. Parents will be contacted via telephone in such cases.
