Setting up Eduroam – Apple iOS 11 and Earlier

This document will cover the setup process to connect to the Eduroam network using an iOS 11 or earlier device.

<table>
<thead>
<tr>
<th>Go to connect.wm.edu and install configuration profile</th>
</tr>
</thead>
<tbody>
<tr>
<td>In a web browser go to <a href="https://connect.wm.edu">https://connect.wm.edu</a> and click ‘Begin eduroam setup’</td>
</tr>
<tr>
<td>Check that Apple iOS (iPhone/iPad) is selected as your device type.</td>
</tr>
<tr>
<td>Then press ‘Install Configuration Profile’</td>
</tr>
</tbody>
</table>
Enter in your WMuserID and Banner (CAS) password. Click login.

Click ‘Allow’

Click ‘Install’
Enter Passcode

Click ‘Install’

UNMANAGED ROOT CERTIFICATE

Installing the certificate “USERTrust RSA Certification Authority” will add it to the list of trusted certificates on your iPhone. This certificate will not be trusted for websites until you enable it in Certificate Trust Settings.

UNMANAGED ROOT CERTIFICATE

Installing the certificate “AddTrust External CA Root” will add it to the list of trusted certificates on your iPhone. This certificate will not be trusted for websites until you enable it in Certificate Trust Settings.

Click ‘Install’

Click ‘Done’

From the home screen, open ‘Settings’.
Click ‘<General’
Click ‘<Settings’

Your device should now be connected to the ‘eduroam’ network.
If you are connected to a different network, open the ‘Wi-Fi’ menu and select ‘eduroam’
