

Using the Directory to Lookup a Number

- Press the **Directory** function key.
- Use the Scroll key to the left of the display screen to move down the list.
- When you find the name you're looking for, pick up the hand set **OR** press the **Dial** soft key.

Filtering the Directory to Search for a Number

- Press the **Directory** function key.
- Use the dial pad to spell either first or last name of the person you want to call. (Use # for space.)
- Keep in mind that this is not a cell or texting keypad. Keep typing letters – if the name is in the directory, it will eventually appear.
- If you type a wrong letter, use the **Back** soft key to back space. (The numbers you type will appear after **Name** on the display screen.)
- When you find the name you're looking for, pick up the hand set **OR** press the **Dial** soft key.
