ACM Gordon Bell Prize, Association for Computing Machinery, deadline: 4/15/18; [https://awards.acm.org/bell/nominations](https://awards.acm.org/bell/nominations).
The Virginia Space Grant Consortium has about $40,000 total in outreach program funding for member-led innovative project awards. We would like to solicit any ideas you might have for innovative projects in higher education, precollege education or informal education where a mini grant would make a difference. Here are the caveats:

- Funding must be used for STEM programs in a topical area of interest to NASA. As you know, NASA’s science, engineering and technology interests are quite broad. Call if you have a question.
- You must be able to fully spend and account for the funds by December 31, 2018 as we will be in the final year of an award cycle.
- First priority will be given to good proposals from individuals at member organizations who have not received outreach funding in recent years.

Your mini proposal should consist of a 1 - 2 page proposal and a budget. For university projects selected, we will make the award back through your Sponsored Program Office at the time of the award. Funding will be provided at the time of the award. You will need to account for all expenditures and return any remaining funds by December 31, 2018.

For budgets, no indirect costs are permitted per Space Grant policy. We also have to follow NASA guidelines for Space Grant funding. Funds may not be used to purchase equipment.

We anticipate making 3 – 5 awards contingent on funding availability and quality of programs proposed.

Submit your proposals to vsgc@odu.edu by February 5, 2018. We plan to make selections within a few days of the deadline so we can get funding out to you in a timely way for summer activities.
