Wellness is such a broad term and how we think about wellness is affected by our culture and our life experiences. We believe wellness is conscious, self-directed and evolving; holistic and multidimensional; positive and affirming; and inclusive. All dimensions of wellness need our attention for us to truly flourish. There doesn't have to be a balance among all dimensions. Instead, the goal is to find a personal harmony with the dimensions that is most authentic for you. You can't get there passively, it requires active awareness, acceptance and commitment. It is our hope that the following information about the eight dimensions of wellness will help you get started or refine your wellness plan. All four Health & Wellness departments are committed to optimizing the well-being of our community. We strive to promote flourishing and resilience through education, service and support.
