

Military-Affiliated Student Data

Fall 2022

Notes on the Data

- This study pulled data from students' self-reported military affiliations in the Personal Information Questionnaire (PIQ).
 - The original military tie dataset had complicated missing values and duplicates. The data was cleaned in the following steps:
 - Deleted records with missing values on either military tie branch or military tie status;
 - Only one record was kept for each military tie relation (father, mother, self, stepmother, stepfather, parent, child, guardian, spouse). When “parent” and specific relations (father, mother, stepmother, stepfather) were both reported, kept the specifics.
 - The date of the record was not very useful when removing duplicates, as the duplicates may have the same data entry time. As an expedient, the first non-missing record was kept.
- ```
***** Self Army Veteran 1/13/2016 8:49
***** Self Navy Veteran 1/13/2016 8:49
***** Self National Guard Veteran 1/13/2016 8:49
```
- Duplicate and misleading records indicate the unreliability of self-reports and necessity of adding other data resources in future.
