Bernie's Birthday!

Bernie opens a present that contained a dancing bear from Russia.

On Friday, November 12th, Bernadette Kulas was surprised for her birthday by Natalie, Amy, Olga, and Dee Dee.

PhD Thesis Defense

Good Luck
Christine!

Christine Conrad, a graduate student at the Virginia Institute for Marine Science, is set to give her Ph.D. defense on December 14th, 2004. Her research was on the investigation of molecular-level interactions between heavy metals and environmentally important reactive phases.

JLab Visitor

Eugene Chudakov, a Jlab Hall A Physicist took a tour of our lab. He is pictured here with Natalie who was explaining the operation of the ToF-SIMS.

ASM Students' Night: Fun in Metals

Roger Crider, a teacher at Landstowne High School, and his students Corey, Heather, Rebecca, and Francis, take a tour of the lab before students' night

The students listen intently as Michael Barnes talks about the Center for Piezoelectrics by Design.

A lecture on "Fun in Metals" was given by Dr. Robert Pond, Jr. head of Engineering Science at Loyola College.

On November 9th, high school students from all over eastern Virginia came out to ASM's annual Students' Night. Students and teachers enjoyed dinner and a lecture entitled "Fun in Metals", which answered questions such as: what is a metal? Where do metals come from? Can metals make noise? Can they remember? The lecture was written by Robert Pond, a professor at Johns Hopkins, and was presented by his son, Dr. Robert Pond Jr., the chair of the Engineering Science Department at Loyola College in Maryland.
