

The Art of Science

NEW BILLBOARD

Our newest billboard, located just outside of Lab 123, shows just how beautiful science can be.

Hirox Microscope

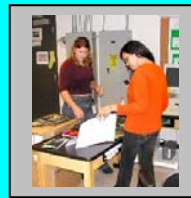

Our Hirox Microscope is fully operational now, and was the main microscope used to create the pictures. It has been placed inside an Isochamber to protect it from vibrations and dust. Lab Tech Ryan Mendenhall, a Tabb High School Senior, is pictured here taking pictures with the Hirox. This new microscope can zoom up to 7000x magnification.

Galleria of Photography

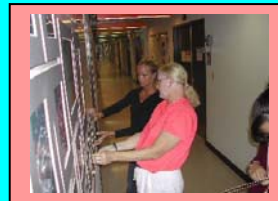

Construction

Once the pictures were finalized they were attached to a poster board for display.

Amy Wilkerson, Natalie Percy, Dee Dee Hopkins, and Dina Abdel-Fattah all work hard to prepare the poster for display.

President Gene R. Nichols Visits!

The President of the College came for a visit Thursday, August 18. He is pictured viewing our new bulletin board, which is showcasing some of the images we acquire in our lab
