April 16 in the Surface Characterization Lab

Our Lab volunteers worked hard during the JLAB Open House Event when thousands of people visited JLab and ARC building to get acquainted with the latest achievements in fundamental and applied science. Pictured from left to right: DeeDee Hopkins, Natalie Percy, Michael Bagge-Hansen, Thomas Rusher, Kelly Sullivan, Amy Wilkerson, Olga Trofimova, and Jianjun Wang.

Natalie Percy, Kelly Sullivan and Michael Bagge-Hansen are demonstrating Lab equipment to hundreds of people of all ages.

Kids are fascinated by the possibility to use the microscopes and discover the whole new micro world.

Crowds of people filled up the Lab, friends and family members of the volunteers among them.

Amy's friends Elizabeth Lambert, Laurel Lupton and Kathy Taylor-Lupton on the left and Dr. Jim Jacobs with his grandchildren Connor and Reid Wolf on the right.

Michael Bagge-Hansen and his parents on the left, Joan Thomas and her daughter on the right.

Outstanding Presentation

Dr Allan Rowe, from NSU, gave an outstanding presentation for kids and adults. He demonstrated several chemical reactions and gave simple but precise explanations of them, demonstrating a great sense of humor.

Children admired Alan Rowe's entertainment event. One of the youngest among them – Amy's granddaughter Abby.
