

### Lab Visitors

Rod Linnken (Black Labs) and David L. Myrick (Friel Training) stopped by the lab for a tour. Rod has been using the micro-hardness tester for his samples.

Michael Kelley brought Neil Norman by the labs on April 13<sup>th</sup> for a tour. Dr. Norman is a visiting Assistant Professor at William and Mary's Department of Anthropology.

Dr. Kelley is shown here with Caitlin R. O'Grady, a Commonwealth Conservator with the VA Department of Historic Resources. They stopped by the labs to see the equipment and to talk with Olga.

### Students at Work

On April 6<sup>th</sup>, Olga worked with Norfolk State University graduate students Ozgul Yasar (middle) and Olu Bamiduro (right) on the Atomic Force Microscope (top picture). In the bottom picture, NSU graduate students Olu Bamiduro (left), Ozgul Yasar (middle), and Gilbert Kogo (right) pose for the camera.

### Visitors

Amy is pictured here with Jan and Mitzie Foley who stopped by the lab to visit her and take a tour. Amy knew Mitzie from Japan, where Amy grew up. In the mid 1960's Amy would vacation at Mitzie's parents house, which was located in a tiny remote mountain village. She remembers fondly attending the local school and falling in love with the family's private bath house.
