

## AFM

Olga worked with NSU researcher Heng Li on the Atomic Force Microscope examining his sample, after reviewing the data taken for the first sample they agreed it needed to be polished further to acquire a better image.

## Getting the lab ready for the new FESEM

Olga stands in an open space where the Hitachi S570 SEM used to sit.

## Lab Visitors

After leaving to pursue a job at Northrop Grumman Newport News Shipyard in Nuclear Engineering Natalie came back to the lab for a visit. She is shown here with Olga and Amy.

## The FESEM Arrives

It has arrived; the Hitachi 4700 FESEM is now the newest member of the ARC laboratory team
