Behind the Scenes Tour of the Mariner's Museum

On August 4th, Eric Nordgren, Senior Conservator, led a behind the scenes tour of conservation areas at the Mariner's Museum. The conservation work being performed on the *USS Monitor* was particularly interesting to Surface Characterization Lab personnel since numerous *Monitor* samples have been analyzed in our lab.

Lab Visitor

Mike, Amy Wilkerson's son, stopped by the lab during a visit from Texas. Mike recently assumed a new position and relocated from Virginia to Texas.
