Applied Research Center Student Newsletter

## Research/Student Highlight

Michael Bagge-Hanson starting working at the lab the summer he graduated from high school and continued working here as a Laboratory and Research Technician while attending William and Mary. Michael graduated from William and Mary in 2007 with a B.S. in both Physics and English Literature. In 2009, Michael completed his master's degree in Applied Science and this May, Michael will receive his Ph.D. in Applied Science. To support his graduate research, Michael has been analyzing thin film on carbon nano sheets using the scanning electron microscope. Michael is evaluating the morphology of the film for his thesis under the direction of Dr. Ron Outlaw.
