Congratulations Nick!

For the second year in a row, our very own Nick Moore participated on Old Dominion University's Baja Team. This year, the Society of Automotive Engineer's (SAE) annual Baja competition was hosted by the University of Wisconsin- Madison. Nick and his team members drove to Wisconsin for the four day competition along with 97 other teams. The ODU team placed 55th in the competition overall.

ODU BAJA Picture thanks to William Booze

Student Highlight:

Former Lab Summer Intern Laura Lee Worrell Selected for Internship at the National Center for Preservation Technology and Training (NCPTT)

Laura Lee Worrell was selected along with four other students to participate in NCPTT's 10-week summer internship program. She is working in the Materials Conservation program evaluating commercially available primers for weathered wood.

Laura Lee worked at the lab during the summer while she attended high school. She is currently a senior at Virginia Tech and will be graduating this December with a major in Building Construction and Design and Real Estate. In conjunction with her major, she has participated in four Associated Schools of Construction (ASC) Region II Design-Build Student competitions and one National ASC LEED competition in Reno, NV. She is an active member of Pi Beta Phi Fraternity, Virginia Zeta chapter and the Virginia Tech Chapter of Habitat for Humanity. She plans to study for a Masters degree in Historic Preservation.
