

# STUDENT NEWSLETTER

## Researchers from CNU

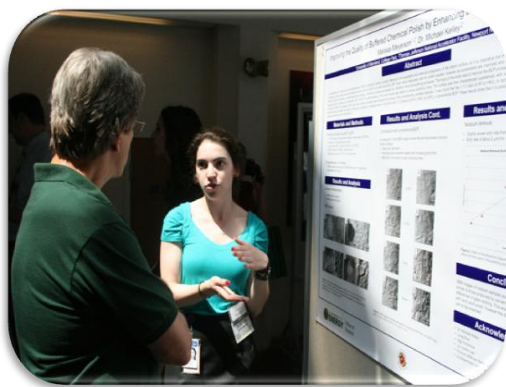

Gaby Alvarez and Teresa Copeland, both Christopher Newport University students, came by the lab to use our Phenom microscope as part of their research on absorbancy.

## Hitachi Rep Visit

Amy and Nick met with Hitachi Representative Roger Teppert to discuss new sample preparation equipment. Mr. Teppert provided an overview of the Zone SEM Desktop Sample Cleaner and Desiccator and the IM4000 Ion Milling System.

## Jefferson Lab Summer Intern Science Poster Session

More than 35 high school and college interns that participated in Jefferson Lab's summer science enrichment programs presented their work at the annual summer intern science poster session. Melissa Meyerson, a Summer Undergraduates Laboratory Internship (SULI) participant under Dr. Michael Kelley, is pictured here discussing her work at the poster session. Melissa has returned to the University of Maryland as a senior majoring in Chemistry.

## Best of Luck to Minzhen!

Minzhen Cai stopped by the lab to say good-bye with a beautiful watermelon fruit basket. She received her Ph.D. from the Applied Science Department at William & Mary in 2012 and just completed her post graduate work under Dr. Hannes Schniepp. We wish her the best of luck as she moves to Minnesota to start a new career.

*Samson, Cheryl and Nick are pictured here with Minzhen on her last visit.*

## Back to School!

We said good-bye and best wishes to Michelle Bailey before she left to start her graduate work at George Washington University.

Best wishes were also in order for Cheryl Outland who is starting her freshman year at Radford University. Cheryl was able to give her little sister a tour of the lab before she left and both of them were full of smiles. We know Cheryl's granddad Richard Proper will miss her at work and at home.
