## October 2016 - Lab News

Harry Eller has been able to efficiently coordinate the move of equipment from the ARC Thin Film Deposition Lab to McGlothlin-Street Hall on William and Mary's main campus. All of Harry's previous work with stabilizing and packing the equipment for transport paid-off since everything arrived in Williamsburg safely.

Former Lab Tech Nick Moore was able to make a next-day visit to access the status of the Phenom Pro microscope in ARC Lab123. Nick is currently an Applications Engineer at Nanoscience Instruments in Alexandria.
